

- Assembly Notes:**
1. The Antenna has two sets of 12 x Radial Tubes -
    - Short length - assembled horizontally
    - Long length - assembled at an angle
  2. A wipe of Conductivity Paste has been pre-applied into the Radial mounting holes of the Antenna Head. Insert each Radial Tube until it 'bottoms out' then tighten, (with supplied Allen Key), the Grub Screw so it 'bites' into the Radial Tube. The Long Radial has a locating groove for the Grub Screw.
  3. Re-check that all Grub Screws are tight.
  4. Snap fit supplied Damperner Assemblies to approx. centre point of Long Radials - see Details 2. & 3.

## B51 Series Antennas
