

## Model B55AL Air Band Monocone Antenna Assembly Instructions

The two radial elements of the B55AL antenna are to be secured to the mount tube at right angles to each other using the U-bolts and nuts provided.

1. The mount tube has 2 labels marked "A" and "B".
2. Secure the first radial element marked "A" so that the label is directly aligned with the "A" marking on the mount tube.
3. Secure the second radial element marked "B" underneath the first element and aligned with the "B" marking on the mount tube.
4. Radial elements "A" and "B" should now be aligned at a 90 degree right-angle.
