

Ground/Earthing kits

In the event of a lightning strike, a ground earthing kit is an essential precaution to protect coaxial cable and valuable transmission equipment from a destructive power surge.

For the maximum protection possible, a coaxial power surge protector installed in the feeder cable line is also highly recommended.

Coaxial feeder cable, connectors, water-proofing, bird proofing and other installation accessories are all available separately.

GK950

Order code	Specifications
GK1580	to suit 1-5/8" flexible foam dielectric cable
GK7850	to suit 7/8" flexible foam dielectric cable
GK1250SF	to suit 1/2" super flexible foam dielectric cable
GK1250	to suit 1/2" flexible foam dielectric cable
GK950	to suit RU400, RG214 or RG213 coaxial cables
