

## A-2654-2

### Antenna extension mounting pole

A extension mounting pole is a quick and easy to install accessories for clearing obstructions such as high roofs or other antennas.

The antenna is the mounted to the mount pole using the appropriate mounting bracket or clamp, not supplied. Please contact ZCG for more information or assistance.

Mounting hardware, coaxial feeder cable, bird-proofing and other installation accessories are all available separately.

Specifications	
Order Code	A-2654-2
Construction	Corrosion resistant aluminium pole and 2 x 316 stainless steel U-bolts
Dimensions	Length: 1.1m, Diameter: 25mm
Suitable antennas	Any antenna that requires a stand off around a roofs overhang: Examples: SGDB-TPM, SGDB-T10, CM1600-AM, Y4 or Y8 series Yagi or LPY698-2700 - Please consult ZCG for more other capatible antennas
Mounting	Mount using the 2 x 316 stainless steel U-bolts with 25mm capability around the pole and protrude the threads through your wall or mounting plate.
Mounting position (recommended)	Mount as high on your fascia board, barge board or wall as possible to have pole extending above obstruction. Mount antenna/s as high on pole as possible, ensuring no contact between antennas.
