

## Magnetic Bases

Antennas bases and cable assemblies

Page 1 of 2

ZCG manufacture a wide range of magnetic bases, suited for use on hire cars or an ever-changing fleet of vehicles.

These magnetic bases are typically mounted onto a vehicles roof and removed when not required. The PVC matted pad on the bottom will prevent scratching of your vehicles paintwork surface to which the base is applied.

Alternative connectors, adaptors and water-proofing and other installation accessories are all available separately

Specifications	MGB-OB
Construction	Black powdercoated base and 5/16"-26 TPI threaded brass termination
Diameter	10.5cm with internal magnet
Cable	4.7 metres RG58 low loss stranded, side exits from base
