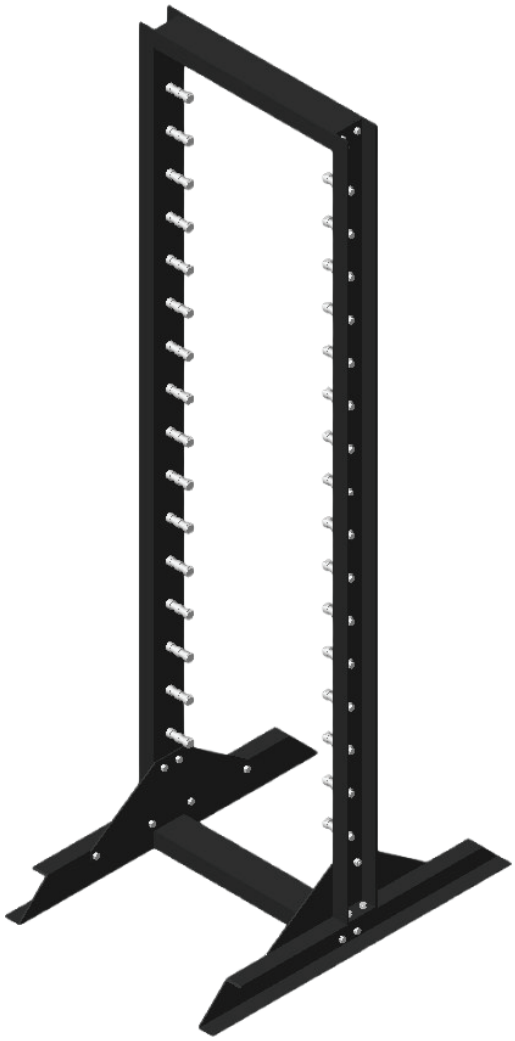
FR-16-200

Cavity Filter Stand – 200 mm Diameter, 16-Position

Build To Order

ZCG's filter stand provides a compact, open-layout solution for securely mounting up to 16 cavities with 200 mm diameter. Its streamlined design ensures easy access to all components for tuning, testing, and servicing, while offering excellent mechanical stability with minimal structural bulk. The stand features precision-machined aluminium components and 304 stainless steel hardware, delivering long-term durability and corrosion resistance. Welded brace and leg assemblies provide a rigid, stable platform, and pre-drilled mounting plates ensure accurate alignment of all cavity filters. Supplied in a flat-pack kit to reduce freight costs, the stand is straightforward to assemble on-site with standard tools. It's an ideal support structure for ZCG's high-performance cavity filter systems.

Consult ZCG on your specific requirements if you cannot see a solution below.



SKU	FR-16-200
Construction	Corrosion resistant aluminium and stainless steel hardware
Clamp capability	Single cavity filter
Filter diameter capability	203mm O.D.
Filter height capability	476mm
Height	1920mm
Width	558mm
Mounting	32 x Machined aluminium mount pegs
Mounting requirements	Floor-mounted installation with secure anchor points
